and requests reconsideration of orders directing the outlay for this work being met from the Mund funds.

The papers for orders in this case are pp. 63 to 66

2 Sl. 63 is a reply to pl 62 and explains why the outlay for (1) Sanitary improvements to Devaraja Market & (2) reconstructing a tunnel across the Narasimhasastry's R. should be met out of the Trust Board funds and also refers to pl. 60.

3 pl 66 is for reconsideration of orders passed in pl 65 with regards the filing up of Pinnals etc & refers to both 60 & 63.

4 It may be seen that orders on pl. 62 were passed after perusing pl. 60 & notes relating thereto were seen by H.E.H.

20/VII/18

4 In his letter of 10th Sept 18, the President points out the reasons why (1) improvements to the mutton stalls in Devaraj market, and (2) reconstructing the tunnel near Subbaraya's choultry should not be treated as Mund works. The President points out that since the stalls were constructed by the Trust Board, the deposits should be remitted by the Board, in the case of the Devaraj market. The cost of the tunnel is also to be borne by the Trust Board.

It will be observed that the amount

involved in the case of the improvement of these two works, is comparatively small as Rs 4 lacs and may be covered by the net out of the sum for special works in Trust Rs grant. It is however a point for consideration whether the Chairman may not be asked to offer his remarks on the report of the Board as regards the Constructional Depts sentiment.

5 As regards part filling up of Pennaya's Nala, the estimate for which was recently sanctioned after a consideration of the Board's and the chairman's comments in this connection, the Board pleads inability to undertake it out of Trust funds. ~~[illegible]~~ A reconsideration of the orders already passed is a matter for orders. Chairman's remarks

PWD 3

The reply now received from the chairman is only a repetition of the contention of the Board that certain works should be treated as Trust[ees] works and that the estimate of 20000 proposed by the Mily should be treated only as a loan and not as a final charge. There no doubt there is much force in what the Chairman says regarding the works in question. As regards the Serenya market, the Trustees have already spent a large sum and the addition now estimated for is very small when compared with it. In the order of July 1915 (Flag J), the question of apportionment of cost of this work was left for future settlement after 3 years. Though 3 years have elapsed since the date of the said order, this question has not been raised as yet. What portion of the work has been carried out and what remains to be done is not also known. This however is a separate question, but for the

Serial No.

present case, the Chairman may be requested to carry out this work also out of the available grant in the Trust Bd funds, leaving the question of ultimate apportionment of cost to be decided in accordance with para 4 of the Madras Govt letter. This para shows that the Chairman is required to maintain capital & revenue accts for the work.

Flag J

17 As regards the tunnel across Naram Salter Road through what the Chairman says is correct, the estimate is too small & will necessitate further appeal to the Board, and since the other estimate for improving the Sulliyagan Kere has been met out of the Govt grant of Rs 25000 in the Trust Bd, there may also be advised to be met out of this grant

Flag S (Mk 24-12-5)

18 The most important item which requires re-consideration is the filling up of Sunnaya Nalla. This has been ordered to be met out of Govt funds, after a consideration of all the aspects of the case. (vide pages 6, 7, 11 & 12 in Mk 12-1)

D + M

This is a work primarily intended for the safety of the city & to improve the sanitation of Ryder Extension, which it is the duty of the Municipality & not the Govt. The Govt has really urged no reason why it should be treated as a Trust Bd work and his contention that the Municipality should

NOTE—Contn sheet

OFFICE OF THE PRESIDENT,
CITY MUNICIPAL COUNCIL, MYSORE

Dated 10th Sept 1918

FROM,

RAJASABHABHUSHANA DIWAN BAHADUR,
C SRIKANTESVARA AIYAR, B A, B L,
PRESIDENT, CITY MUNICIPAL COUNCIL,
MYSORE

15055

To,

B. Ramaswamaiya, Esquire., B.A , B.L ,
Secretary, to the Government of His Highness the
Maharaja of Mysore, Revenue Department

SIR,

With reference to your letter No. 3603/Ml. 12-17- 62 dated 4th September 1918 regarding the advance of Rs. 20,000/- proposed to be made to the City Improvement Trust Board by the Municipal Council subject to adjustment in due course for the execution of certain urgent and necessary sanitary works in the City, I have the honour to state that the two works Viz.-

(1) Sanitary improvements to the mutton stalls in the Devaraj Market and (2) reconstruction of a tunnel across Narainsastry road near Subbarayanakere' to provide proper water-way in tunnel are mentioned in paragraph 1 of your letter as works which the Municipality should undertake out of its own funds.

(2) As regards (1) Sanitary improvements to the mutton stalls in the Devaraj Market, I beg to state that the work required to be done was only a rectification of the defects in the construction of the stalls which were not fit for use asmutton stalls without the defects being cured. The stalls were newly constructed by the Trust Board and the platforms thereof had been paved with rough stones with an uneven surface so that the blood and dirt falling thereon

14

thereon could not be washed off, nor the place kept clean and sanitary. The accumulation of filth and dirt in the crevices of the rough stone caused stinking smell and rendered the stalls most insanitary. The mere rectification of such defects in the construction of the mutton stalls newly built by the Trust Board cannot, it is submitted, be considered as a work of improvement, the cost of which is to be met by the Municipal Council.

(3) There have been more of such constructional defects which the Municipal Council have brought to the notice of the Trust Board as per copy of letter No. 149 dated 27th July 1918 with the note therein referredto, herewith submitted for reference, and all these will have also to be rectified by the Trust Board before final payment is made to the contractor who is yet going on with the work.

(4) Similarly the work of reconstructing the tunnel across Narainsastri Road near Subbarayanakere', is a legitimate work of the City Improvement Trust Board as the area in question is under their operation and the work is one needed for the drainage of the Subbarayanakere' which is being dealt with by the Trust Board. It is a part of their sanctioned works and without the timely proper drainage of the Kere', their work to it was liable to get damaged. And as it was represented to me that they had no funds in their then Budget for such urgent work, I moved the Council to give them the temporary accommodation to which they most reluctantly assented, on condition that the adjustment was effected early. Further, the area has not been revested in the City Municipal Council under Section 21 of the City of Mysore Improvement Regulation and as such, the Council feel that the cost of the work is a legitimate charge on the funds of the Trust Board.

(5) Under these circumstances, I request that you may be so good as to move the Government to reconsider their orders in these 2 matters in the light also of my communication to them on the subject of these advances in my letter No 22 dated 2nd August 1918

to

16

Letter No. 149 dated 27th July 1918, from the President, City Municipal Council, Mysore, to the Chairman, City Improvement Trust Board, Mysore.

Sir,

I have the honour to forward herewith a note on the condition of the newly built stalls in the Devaraja Market and to request that you may be so good as to arrange for the defects being rectified and the needful improvements effected at a very early date, as in view of the prevalence of plague in the City, the present building may become a source of infection endangering the lives of the occupants of the stalls as well as those resorting to the market on business.

I have the honour to be,

Sir,

Your most obedient servant,

Sd/- C Srikantesvara Aiyar,

President.

[illegible]

N O T E.

Certain constructional defects in the new Devaraj Market.

[illegible]

N O T E.

Certain constructional defects in the new Devaraj Market.

I. The platforms for the stalls.

(1) The first step.- This is far too high. Old people cannot climb it with safety. Some people in trying to climb it have hurt themselves.

Arrangements must therefore be made to put up an intermediate step. A type of a step in the form of a bench between the cellar doors, has been fixed for one of the stalls, and the rest of them should be fixed as quickly as possible to avert danger and blocking the passage as is now done in their absence.

(2) The surface of the steps of the platforms.- The surface is paved with rough burnt stones. When this important market was being designed, on sanitary grounds it was specifically laid down that the stones should be well dressed. These, however not having been sufficiently finely dressed, their surface is very rough and pitted, allowing accumulation of dirt and filth which cannot be easily swept or washed out. Further, they not having been evenly laid, when looked at from one end of the stall, the surface looks undulating and is unsightly.

(3) The jointing between the slabs.- The edges and ends of these slabs not having been properly dressed, two adjoining slabs do not approximate to each other. The result is crevices and gaps. These have been filled up with a very inferior kind of mortar which has already given way in many places leaving unsightly and insanitary gaps which cannot be satisfactorily closed unless the slabs are properly dressed.

(4) The cellars.- There is one cellar under each stall. This cellar has a door in front and three port-holes on the top. These ports are evidently intended to let bad air out from the stalls.

It is not clear how they will do this. If bad air has to get out, it has to be driven out by a blast of fresh air from below. The cellar doors when shut at nights and at other times, not having been provided with any inlets for fresh air, foul air from the cellars cannot get out. There is thus no facility for ventilation of the cellars but it seems as though in these port-holes every facility has been provided for admitting reptiles and rodents into the cellars. It can be imagined how damaging to stall holder's articles and how dangerous to the visitors and stall holders in plague seasons these non-rodent proof cellars are.

The walls of the cellars not having been built of sound and strong materials, rodents have already burrowed through them into the cellars. What with the unprotected port-holes and the rat burrows through the walls, there is no safety either to property or life of the vendor and the visitor.

The doors of the cellars are of unseasoned wood which have already warped and do not fit well. Hooks or bolts should be provided inside so that they may be tightly shut to keep out rodents &c.

Again the flooring of the cellars is lower than the level of the passage in front. The result is, the cellar washings cannot possibly be drained out.

The cellars therefore require improvement. They should be provided with facilities for ventilation and they should be rat proof.

It is suggested that the floors of the cellars be perforated and lined inside with fine wire netting. These will allow fresh air to get in and at the same time keep out rodents. Similarly the portholes should be protected inside by fine wire netting. A better kind of durable and hard material should be used for plastering the walls of the cellars, to prevent rodents from burrowing. All the doors should be made to fit well.

To enable thorough washing of the floors of the cellars, they should be laid at a higher level than the passage in front, with a gentle gradient towards the door and with a small outlet under the door sill.

II. <u>The iron pillars supporting the roof.</u>

These have not been fixed properly with bolts and nuts at their feet, now with their full compliment at their crown. These require to be attended

III. <u>The storm water drains.</u>

These have been closed over by sl: The sides of these slabs not having been properly dressed, the ining surfaces do not approximate to each other. The resu.. .s earth and sand with lot of sweepings and rubbish get through the crevices and gradually choke up the drain. If the slab covering of the drain is not immediately mended, earth and sand and other market debris will keep constantly getting into the drain and eventually lead to obstinate chokage and trouble necessitating constant ripping open of the drain, by no means an easy and cheap task. It is already well-high getting choked up.

It is therefore necessary that these covering slabs are laid properly without any crevices between them.

IV. The following urgent improvements are therefore

Sir,

With reference to your letter No 7292-LL 12-17-67 dated the 12th ultimo, forwarding copies of letters No 56 and 61 dated the 10th September 1918 and 23rd October 1918, respectively, from the President, City Municipal Council, Mysore, and requesting me to stat whether under the circumstances reported, the outlay on the works mentioned therein may not be ultimately charged to the Trust Board funds, I have the honor to report as below:-

(a) In his letter No.56 dated the 10th September 1918, the President states that the estimate for Rs 1,217 for Sanitary Improvements to the mutton stalls in the Devaraj Market was for the mere rectification of the defects in the original construction of the stalls and as such it should not be considered a work of improvement to be paid for, from the Municipal funds The nomenclature of this estimate given is not quite correct, it ought to be " Sanitary Improvements to the stalls in the Devaraja Market " This estimate provides for the undermentioned three items -

(i) Constructing burnt stone benches on either side of the vegetable and fruit stalls (Estimate Rs 550)

Report regarding the certain Municipal works to be undertaken by the Trust Board

25

(ii) Removing burnt stone flooring slabs originally used and replacing them by Cudappa Slabs for mutton stalls (Estimate Rs 432)

(iii) Connecting cement concrete drain alround the stalls (Estimate Rs 235)

The first item is an additional improvement, not provided for in the sanctioned estimate for the improvement of the Devaraj Market

The second item is an improvement proposed over that portion of the original estimate relating to the flooring of the mutton stalls, after the work according to the sanctioned estimate was carried out

The third item is an original work of improvement and not a rectification of any previous defect

(b) With regard to the improvements of the Devaraj Market the Government have more than once pointed out that it is purely a Municipal work When an estimate for Rs 38,503 for this work was submitted by the Trust Board, the Government returned the same observing in their Order No 21-2 LL 193-11-3 dated the 1st July 1912, that the said work was not of special importance to justify its being taken up by the Trust Board and that it should be left to the Municipality to carry out the work from its funds

The above estimate was submitted again to Government for reconsideration and sanction to carry out the same, out of Trust Board funds The Government again declined to do so, observing in their Order No 2750-ML 113-12-2 dated the 1st October 1912, that the Mysore City Municipality must find funds to carry out the aforesaid work and as the Municiplity had no funds then, the work must wait till funds became available

When, however, the estimate was sanctioned subsequently

for

subsequently, the Government in their Order No.221-5LL 51-14-63 dated the 12th July 1915, directed that the amount spent --- on the execution of this work should be treated as an advance from the Trust Board funds, is-as-much as it was expected that the greater part of the amount so spent would be recouped and the work when completed would yield some return on the net --- outlay incurred

While the trend of the Government Orders is such, and the Trust Board have already advanced out of their funds Rs.67,860 for the above Municipal work of improving the --- Devaraj Market against the estimated amount of Rs.1,23,500, and while the items comprised in the small supplemental estimate amounting to Rs 1,217 for improving the stalls of the market do in no way form rectifications of defects in executing the items of work of the sanctioned estimate, the argument that the costs of such supplemental works do not form a --- legitimate charge on the Municipal funds does not, it is --- submitted, seem to hold good

(c) The cost of the work of reconstructing a tunnel across the Narain Sastri Road, estimated at Rs 2,837 is explained to be a legitimate charge on the funds of the Trust Board, the reasons assigned being,

(i) That the area in question is under the operation of the Trust Board

(ii) That the work is one needed for the ---- drainage of the Subbarayankere tank bed which is being dealt with by the Trust Board and,

(iii) That the area has not been re-vested in the Municipal Council under Section 21 of the City of Mysore Improvement Regulation.

The above reasoning seems to have been based on the

the hypothesis that the work of improving the Subbarayankere bed sanctioned in Government Order No 1886-7L L 24-18-5 dated the 1st August 1918, is a work undertaken by the Trust Board under the provisions of the City of Mysore Improvement Regulation The fact is that the above work is not one falling under the provisions of the City Improvement Regulation It was a work required to be carried out under the orders of Government, out of the Special allotment, for which the rules relating to works under the Trust Board are not applicable - Vide Government Order No. 221-5 ML 51-14-63 dated the 12th July 1915

Hence the above grounds of objection do not seem to be to the point

(d) As regards the cost of the work of filling the Purniah's Nala estimated at Rs 26,855, the President states, in his letter No 81 dated the 28th October 1918, to Government, that the Order of Government dated the 27th September 1918, requiring the Municipality to meet the cost of this work, seems to have been passed without reference to his letters No 22 and 56 dated the 2nd August 1918, and 11th September 1918

Letter No 22 is said to be the letter giving cover to copy of the President's letter No 196 dated the 31st August 1918 to the Chairman In this letter, the President wrote to say that the Municipal Councilowere unable to treat the promised amount of Rs 20,000 as a final payment and that from the very commencement it had been understood and expressly agreed upon that the said amount was purely to be a mere advance to the Trust Board and not a final payment What is involved in the case is not, it is submitted, so much the question of ability or otherwise of the Municipality to pay the cost of the work, as much as it is of the

the propriety or otherwise of the same being borne by that body . hat understanding there had existed in point of meeting the cost of these works, is expressly contained in this office D O letter No.215 dated the 23rd May 1918, to the President, wherein it is mentioned that the advance of --- Rs 20,000 is understood to be " the first instalment payment towards the cost of these works desired to be executed by the Trust Board for the City Municipal Council and is a final charge upon the Municipal funds." It will thus be seen that the President's letter No 22 dated the 2nd August 1918, --- contains but general remarks without special bearing on the point at issue

As for the other letter referred to by the President (ie) No 56 dated the 2nd August 1918, it relates exclusively to the works mentioned in paragraphs (a) & (c) above and not to the work of filling the Purniah's Wala

2 It will be seen from the foregoing that there seems no reason for the outlay on the marginally noted works

1 Sanitary Improvements to the mutton stalls in the Devaraj Market estimated to cost	Rs 1,217	(the estimated cost of which amounts to Rs 30,911) being ultimately -- charged to the Trust Board funds, consequently the direc - tions of
2 Reconstructing a tunnel across Narain Sastri Road near Subbarayan -pere to provide proper water way in tunnel estimated to cost	Rs. 2,837	
3 Filling the Purniah's Pala to a depth of 19' and countergrading it estimated to cost	Rs 26,857	

Government contained in paragraphs 1 and 2 of your letter

letter No 3063 LL 12-17-62, dated the 4th September 1918, to the President of the Municipal Council, Mysore City, requiring the Municipal Council to bear the outlay on the said works from their funds, still hold good

3 The Trust Board is for the most part run with Government money and it has expended a sum of about Rs 56 lakhs of rupees on account of the several improvement schemes undertaken by it to the relief of or addition to the resources of the Municipality of the Mysore City under the provisions contained in Clause (b), of Sub Section 2 of Section 26 of the City of Mysore Improvement Regulation, the Municipal Council is enjoined to make such contribution out of their funds as may be called upon by Government from time to time, in consideration of the above

4 It may also be stated that a programme has been sanctioned by Government in their Order No 7415-LL 95-17-11 of 14th December 1918, allotting the Trust Board funds for specified works during the next 5 years mainly on works already sanctioned and in progress, without disturbing the arrangements already made and keeping back works sanctioned, so money can be made available out of the sanctioned Trust Board grant for the next 5 years

5 I solicit the favour of your obtaining the final orders of Government in the matter and communicating the same at your earliest convenience, so that needful funds may be forthcoming for the urgent works under reference Two of these works, viz, constructing a tunnel across the Narayana Sastri Road near Subbaroyankere and improvements to the stalls in the Devaraja Market have already been put in hand The President of the Municipality informs me in his letter No 239 dated the 23rd August 1918, a copy of which is enclosed herein,

herein, that in order to place the promised amount for these works at the disposal of the Trust Board, orders of Government are awaited by him on his reference.

I have the honor to be,

S i r,

your most obedient servant,

C h a i r m a n
